

The Truth About Birth Control Documentary

Dom: Did you know that birth control pills actually cause early silent abortions? Most people think that birth control pills simply prevent a woman from getting pregnant, which is sometimes the case. However, birth control pills also act as an abortifacient, snuffing out a young life that has already begun. Not only that, but the Bible actually condemns OTHER birth control methods as well. In our modern society, birth control is just something that most people take for granted, and have never even questioned. But we as Christians are commanded by the Bible to prove all things. And in the course of this film, you will learn the shocking truth about birth control.

Lady: Currently in the United States, the pill is used by over 11 million women, many of whom are unaware of it's mechanisms of action, even though they are printed on the packaging. Our message today is that the pill kills babies with it's abortifacient effects.

PA: Birth control pills cause SILENT ABORTIONS. If you are taking birth control pills, you are inadvertently literally KILLING your children. And remember, this is the most commonly used birth control method. So before we get into this subject from the Bible, of whether birth control is right or wrong, let me just start out by saying that the most commonly used, the most popular method of birth control, the one that four out of five women have used is a pill that will literally cause your unborn children to DIE. Let me start out by proving to you from the Bible that LIFE BEGINS AT CONCEPTION. Look down at your Bible at Isaiah chapter 7, verse 14.

Dom: (Quoting Isaiah 7,14)

PA: Now flip over if you would to Matthew chapter 1, because in Matthew chapter 1, this exact scripture is quoted in the New Testament. In the Old Testament it said "a virgin shall CONCEIVE and bear a son." Well in Matthew chapter 1, verse 23, the Bible reads

Dom: (Quoting Matt 1:23)

PA: So isn't it interesting that in the Old Testament it says CONCEIVE, and in the New Testament it says "shall be with child". You know what that tells me? That CONCEPTION produces a CHILD. Not a blastocyst, or an embryo, or a fetus... But God considers that a child. When we talk about beginning at conception, the devil loves to change the meaning of words. Now, conception has historically meant fertilisation. When the seed from the man and the egg from the woman come together and that egg is fertilised, that has been known as conception. But now they're starting to change the definition. And even in some dictionaries, they'll put a definition that says "well, it's fertilisation **OR** implantation."

Dom: Doctor Vanessa Cullens, vice president for medical affairs at Planned Parenthood Federation of America was asked if hormonal birth control pills cause abortion. Her response was "No. Abortion ENDS a pregnancy. Contraception pills work before pregnancy begins. Pregnancy begins with the implantation of the developing fertilised egg in the woman's uterus." Yet, in the next paragraph, she admits, "implantation doesn't occur until 5 to seven days after fertilisation."

PA: Let's see what the Bible defines as conception. Let's make the Bible our final authority. The Bible says in Hebrews 11 verse 11.

Dom: (Quoting Heb 11:11)

PA: So let me ask you this... Could "conceive seed" refer to implantation? Let me explain to you the terms here. The seed from the man travels into the woman's body and finds the egg and the egg is fertilised up toward the top of the Fallopian Tubes. That fertilised egg, that developing child that's multiplying and growing and so forth, begins to travel down that tube until it gets to the Uterus. And when it arrives at the Uterus, it implants itself into the wall of the Uterus, and then eventually that's where the placenta is going to be attached, and then there is going to be a cord,

and the baby and so on and so forth. But that developing life comes down that tube and implants in the wall of the Uterus. Now, when the Bible says that "she received strength to conceive seed", notice the conception is tied in with the seed, isn't it? Is the seed involved with implantation? No, because the seed is long gone, the seed from the man fertilises that egg. And then all the seed is gone, okay? And then a week goes by and then it implants. How could you call implantation conceiving seed? You can't, there is no seed there anymore, the seed has been gone for over a week. So we see that the world's definition that's a new definition that they're twisting and changing things to mean, and that planned parenthood has pushed, is not in tune with the Bible. It's just a lie of the devil to try to get you to say "oh yeah, life begins at conception, that's seven to fourteen days after fertilisation." So here's how these birth control pills work. The combination pill works according to two mechanisms. There is a primary mechanism, and then there is a backup mechanism. The primary mechanism is to stop a woman from ovulating. She does not release an egg, therefore, no pregnancy can occur. Now, if a woman just doesn't release an egg, and no pregnancy occurs, is any human life being snuffed out? Is anyone being killed? No, it's just that no egg is produced, and so there is not a pregnancy. BUT, there is the backup mechanism.

Lady: The pill thins the uterine lining and depletes it essential nutrients such as Glycodelin A to the degree that it cannot nourish a newly conceived baby. IVF data has repeatedly shown that the minimal endometrial thickness which is required to maintain an early pregnancy ranges from five to thirteen millimetres. The average endometrial thickness of a pill user is only 1.4 millimetres. This is simply too thin to nourish a baby. Consequently, the baby dies. And this is an abortion.

PA: You say "well, how often is this happening?" Well, it depends on what type of pill is being taken. The most common pill, the most popular pill is "the combination pill", which is Estrogen and Progestin combination. "Breakthrough ovulation", which is where an egg is released even though you are taking the birth control pill, occurs five to sixty per cent of the time.

Dom: Simple logic tells us that if an egg can be released and fertilised 5 to 60 per cent of the time, and implantation is being prevented close to 100 per cent of the time, a silent abortion is taking place 5 to 60 per cent of months, a woman is taking the pill. Because a seven day old child is unable to implant, and DIES. The morning after pill function after the same principle, to destroy the lining of the Uterus, but in the shorter period of time, due to higher concentrations of the same hormones.

Lady: Women deserve to be told the truth about the abortifacient mechanisms of the pill. To de-emphasise this information is unconscionable.

PA: Same thing with the Depo-Provera patch, the Depo-Provera shots... ANY HORMONAL BIRTH CONTROL METHOD IS AN ABORTIFACIENT, that is causing you to have a SILENT ABORTION some percentage of the time. And we as Christians should just reject it outright, as being manslaughter or MURDER to take these types of pills KNOWING what they are doing to your body, and knowing what they are doing to your children.

Dom: The term "birth control pills" is accurate since they do not prevent conception, but birth. Perhaps the reason God has not ended the abortion holocaust in America, is that God's own people are unknowingly murdering their own offspring. "If thou forbear to deliver them that are drawn unto death, and those that are ready to be slain;" "If thou sayest, Behold, we knew it not; doth not he that pondereth the heart consider it? and he that keepeth thy soul, doth not he know it? and shall not he render to every man according to his works?"

PA: And not only that, I'm doing you a great favour by warning you about these things, because honestly, birth control pills are very harmful to your health in the first place.

Lady: You know, the pill kills. And I'm going to tell you in this talk how that happens. There are four major mechanisms how the pill can kill. They cause your blood to clot, they cause cancer, they make it easier to get potentially infections, and they make it more likely you will die a violent

death. So what about this blood clotting? Well, if the blood clots in an artery of your heart, it's a heart attack, or an MI. If it clots in your brain, that's called a stroke. If it causes clots in the veins in your legs, that's called a DVT or deep venous thrombosis. And if those clots in your legs break off and go to your lung, that's called a pulmonary embolism. In 2005, the international agency on research of cancer, which is part of the world health organisation, a UN body, put out monograph 91, that stated "Estrogen Progestin combination drugs and hormone replacement therapy in birth control pills were group 1 carcinogens for breast, cervical and liver cancer. And yet, that didn't make it on the six o'clock news. 2006, Chris Kahlenborn published a meta-analysis on the pill in the Mayo Clinic Proceedings journal. In 2009, Dahl and other authors put out this paper that showed that you had a 320 per cent increased risk of triple negative breast cancer. Triple negative breast cancer is the hardest breast cancer to treat because it is not sensitive to hormonal treatment, it's not sensitive to that monoclonal antibody drug Herceptin, and there are a lot of deaths from it in pre-menopausal women, especially. So if you took the pill, 18 and under and that's very common, I have patients that come in, they're 22 and they've already been on the pill for 10 years because they were put on it when they were 12 and they had painful periods. So since 1975, by the governmental SEER data that you can look up on the web, the incidents of insight to breast cancers, none invasive breast cancers has gone up 400 per cent in pre-menopausal women. So you also increase the risk of cervical cancer, and you also increase the risk of liver cancer.

PA: If you look at the history of birth control in this country, first of all historically it's been considered ungodly and immoral to use birth control by Christian people throughout history. In fact it was illegal in the United States until the 20th century.

Dom: Before 1936, all contraceptive devices and birth control methods were illegal in the United States of America. In 1938, Judge Argus XXXXXXXXXXXX lifted the federal ban on birth control. In 1965, the United States supreme court overturned one of the last state laws prohibiting the prescription or use of contraceptives by married couples. What the world and the civil government consider immoral, even criminal, fundamental Christianity embraces, less than 70 years later.

PA: Preachers used to be against birth control. You know, one of the most famous baptist preachers of all time was John R Rice. And whether you love John R Rice or you are not a fan of John R Rice isn't really the point. He was a mainstream, very popular independent baptist preacher. John R Rice said this in 1946:

Dom: "Birth control measures in general practice would be disastrous to public morals and public welfare.

PA: Here's what else he said:

Dom: "The use of artificial means, drugs, and appliances to prevent conception has for centuries been regarded as immoral, wrong for the individual and dangerous for society as a whole."

PA: Yet people today will act like "oh, what are you preaching? You are an independent baptist and you are preaching against birth control? You're wild! You're crazy, a fanatic!!!" But this is what everyone used to believe.

Dom: In the words of our 26th President, Theodore Roosevelt, "Birth control is sinful". Could a baptist preacher today say in his pulpit what the president of the United States said in a public speech only 100 years ago?

PA: The woman who is responsible for bringing birth control into the mainstream and making it legal in the United States was a woman named Margaret Sanger. Now this Margaret Sanger was a eugenicist.

Lady: So where did this campaign for birth control as a means for better health and empowering

the family for the black community originate? You have to understand something called eugenics, which was basically... people thought that the "unfit" should not reproduce, and the "fit" should. So from this background of eugenics, someone named Margaret Sanger- and if you're not familiar with her, she was the founder of Planned Parenthood- Margaret Sanger was a proponent of eugenics. And she believed that the "racially unfit" should not reproduce. And during her time in the early 1900's, who would be the racially unfit? Well, they would be african americans.

PA: She believed that white people were superior to other races. And she- like the nazis- believed that certain races were inferior to others, and that we need to encourage those people not to reproduce so that we can just have the "good" people reproduce, and the "fittest" and the strongest people reproduce.

Lady: So in comes Margaret Sanger with her slick talk. But in reality, Margaret Sanger thought of these people as human waste, and that they should not be reproducing anymore, because they were simply weeds. And so she came with her talk of "family planning" and "better health", to try to basically trick the community into buying her program which is really sterilisation, birth control and abortion.

PA: She started an organisation called "The Birth Control Federation of America". And do you know what The Birth Control Federation of America later changed it's name to? Planned Parenthood, which I call "Planned Barrenhood". Planned Parenthood. That wicked organisation that conservatives rail against for being pro-abortion and pro-death, was actually originally known as "The Birth Control Federation of America". So you can see the type of evil people that are behind this agenda. SHE is the one who pushed this through, and got it legal in the United States. She is the one that promoted it, and made it mainstream. This wicked, evil person named Margaret Sanger, who was an evolutionist, and who was not a believer in the Lord Jesus Christ by any stretch of the imagination.

Narrator: This is Margaret Sanger, president of america's Planned Parenthood Federation maintains that European women should stop having babies for the next ten years.

Interviewer: Don't you think that a theory, such a radical theory is antisocial?

Margaret Sanger: On the contrary, it seems to me that it is more practical and humane... From my view, I believe that there should be no more babies.

Interviewer: Do you believe in sin? And when I say "believe", I don't mean "in committing sin". Do you believe in such a thing as sin?

Margaret Sanger: I think the biggest sin in the world is bringing children into the world that have disease, and their parents. That have no chance in the world to be a human being, practically. Delinquents, prisoners, all sorts of things, just marked when their born. That to me is the greatest sin people can commit.

PA: The bottom line is, is that biblically speaking, God wants us to have children, and He wants us to be fruitful and multiply. Let's look at some scriptures on this.

Dom: "And God blessed them, and God said unto them, Be fruitful, and multiply, and replenish the earth, and subdue it: and have dominion over the fish of the sea, and over the fowl of the air, and over every living thing that moveth upon the earth."

PA: And you say "well Pastor Anderson, God's just telling them to be fruitful and multiply because there is only TWO of them. Obvioulsy when there are only two people, you are going to have to be fruitful and multiply." But what you have to understand is that He used the word "REPLENISH" for a reason. Now if He were just talking to Adam and Eve only, the word "replenish" would make absolutely no sense, because "replenish" means to "refill". Well guess what? It had never been

filled before. So how could He tell them "refill" or "replenish"? The reason He tells them to replenish is because of the fact that it is NOT a command just to Adam and Eve, but rather a command to ALL of mankind to continually replenish the earth. Children are going to be born and people are going to die, and it's our job to be fruitful, to multiply and to replenish the earth on an ongoing basis. And the word "replenish" proves that He was not speaking to just Adam only in that scripture. But even so, we have tonnes of other scripture, look at Genesis chapter 9, what God said to Noah.

Dom: (Quoting Genesis 9:1, 9:7)

PA: You say "Pastor Anderson, there's only 8 of them! Of course they need to replenish!" I'm going to show you that this is a theme that comes up over and over, and this wasn't just Adam, this wasn't just Noah. Over and over again, God's people are told to be fruitful and multiply. It says in chapter 17 verse 20.

Dom: (Quoting Genesis 17:20)

PA: And by the way, notice that being fruitful and multiplying is always associated with BLESSING. Being BLESSED. When you're fruitful, when you multiply, that's a blessing in the Bible. Genesis 28, verse 3.

Dom: (Quoting Gen 28:3, 35:11, 48:4, Lev 26:9)

PA: This is when the children of Israel are already numbering in the MILLIONS. There are millions and millions of children of Israel, and they're out of Egypt, and they're going into the promised land, and God says "If you will obey my voice, and if you keep my commandments, I will make you fruitful and I will multiply you." God wants HIS people to be fruitful and multiply, and it's a blessing when they do. Now in Exodus chapter 1, we have a story about the children of Israel. They've gone down into Egypt, and when they went down into Egypt, the Bible tells us in verse 5...

Dom: (Quoting Exodus 1:5)

PA: So, the children of Israel that go down into Egypt are SEVENTY souls. 70 people. And they're going down to Egypt which is one of the most powerful nations in the world, a great big giant powerful nation. They are 70 people. Let's fast forward a few hundred years and look what the Bible says in verse 7.

Dom: (Quoting Exodus 1:7)

PA: Let me ask you this, are God's people multiplying? And look what the Bible says in verse 8.

Dom: (Quoting Exodus 1:8-9)

PA: So are the Egyptians multiplying at the same rate as the Israelites? No. The Egyptians are obviously not multiplying. And by the way, if you go to Planned Parenthood's website, they will tell you that birth control was invented in ancient Egypt. That's what Planned Parenthood tells you on their website. The oldest known birth control we've found was found in ancient Egypt, and the Bible here shows us a contrast of God's people being fruitful, multiplying and increasing abundantly while the population of the worldly Egyptians is not keeping pace at all to the point where 70 people outpaced them. And they say "the people of the children of Israel are more and mightier than we." Now look, Pharaoh here, this evil king that wants to kill children later in the chapter, represents the devil. And so what we see in this story is that number one, God's people multiplied greatly, number two, we see the devil doesn't like it. The devil is upset about it. So what's the devil going to do about it, to stop it. Let's read it. It says in verse 10...

Dom: (Quoting Exodus 1:10)

PA: They said "Look, we need to do something about this, we need to STOP these people from multiplying!"

Dom: (Quoting 1:11-14)

PA: And what do we see here in all these verses over and over again? They're making them do what? WORK, and serve with rigour, and have burdens, and have to do all this hard work and be in bondage. But even in spite of all that, they keep multiplying and growing, don't they? So look what the next step is. It says in verse number 15...

Dom: (Quoting 1:15-17)

PA: So what do we see here in this story? Number one, God's people are multiplying greatly. Number two, the devil doesn't like it. Number three, he afflicts them with burdens, hard work, servitude and makes their lives rigorous and difficult. And then number four, he instructs the Hebrews to murder their children. But do you know what the devil has done to try to stop God's people from multiplying, is he says "you know what? Let's put them to work. And notably, he wants to put the WOMEN to work. Put the WOMEN to work. "That'll stop them from multiplying!" Because what was the devil's answer in Exodus 1? He said "Put them to work and then KILL the ones that are conceived!" And that's EXACTLY what the devil's agenda is today. He says number one, send the women to work. And then they won't be able to reproduce, because they're not going to be able to miss work, they're not going to be able to take care of the kids. So they're going to be so busy with their job, they're going to be forced to use birth control. And then not only THAT, but the ones that they WOULD conceive, we will SLAY them, through what? Birth control pills that do cause silent early abortions, and also through abortion itself. Surgical abortion itself. Now the United States department of labour has these statistics for 2013, that women participating in the labour force in 2013 that are of a working age is 57.2 per cent. And men working is 69.7 per cent. It's not even that different. Think about it. It's only about, what? A 12 per cent difference between the men working versus the women working. It wasn't always like that folks. It used to be that men went out to work, and the women stayed at home. That was the norm, that was the accepted societal norm that men would go to work and provide, and that the women would stay home, MARRY, BEAR CHILDREN, AND GUIDE THE HOUSE. I think I read that in the Bible. 1st Timothy chapter 5 verse 14.

Dom: (Quoting 1 Tim 5:14-15)

PA: "I will"- God's will- "I will therefore that women marry, bear children, guide the house... give none occasion to the adversary to speak reproachfully, for some are already turned aside after Satan." That's what the Bible says. But this story that we see playing out in Exodus chapter 1, IS the devils modus operandi in 2014 as well. Same thing. Put the women to work, and then slay the unborn. That's the plan. You say "Okay Pastor Anderson, you've at least convinced me that the birth control pills are wrong because they are taking a life. I mean, how can you be against the morning after pill, and not against normal birth control pills, when the morning after pill is just a high dosed birth control pill, that's all it is? The morning after pill contains the SAME hormones at a higher dose, that will just quickly change the lining of the Uterus to make it a hostile environment for the child. That's why it works. But you say, "Well Pastor Anderson, okay I'm convinced that birth control pills are the wrong way to go, they're abortifacients... But what about other birth control methods, I mean come on! Are you telling me that birth control is just wrong and that there is no acceptable birth control method?" In a word, yes! But let's just go through the methods quickly. And I'm not going to get into any detail or be graphic or anything, but there are a few different types of methods. Go to Genesis chapter 38 if you would. Genesis chapter 38. Because Genesis 38 is the ONLY mention of birth control in the entire Bible. It says in verse 8...

Dom: (Quoting Genesis 38:8-10)

PA: God got angry and killed him. Not a very good advertisement for birth control right here in Genesis 38. It's not looking good. And especially when you realise this is the only mention of birth control. You say "oh, Pastor Anderson you poor ignorant fool! Don't you realise that the reason why God was mad at Onan was the reason why he spilled it on the ground!" Why? What was wrong with his reason? You say "well, it's because he did it for a selfish reason." Yeah, but everybody who uses birth control is doing it for a selfish reason. Name for me a birth control motivation that's not selfish?

Dom: Why do today's Christians seek to limit the size of their families by means of birth control. Not one reason can be given as to why a Christian would want to bypass the blessing of children that is not motivated by either selfishness, or a lack of faith in God. The Bible clearly teaches that it is the LORD that opens the womb of a woman, and causes her to conceive a child. Who are we to tamper with the will of God? "For the Lord had fast closed up all the wombs of the house of Abimelech, because of Sarah Abraham's wife." "And when the Lord saw that Leah was hated, he opened her womb; but Rachel was barren." "And God remembered Rachel, and God hearkened to her, and opened her womb." "But unto Hannah he gave a worthy portion; for he loved Hannah: but the Lord had shut up her womb. And her adversary also provoked her sore, for to make her fret, because the Lord had shut up her womb." "Shall I bring to the birth, and not cause to bring forth? saith the Lord: shall I cause to bring forth, and shut the womb? saith thy God."

PA: You say "okay, well what other methods are there? There has got to be an acceptable method out there of birth control." Well, these are the basic classifications of birth control methods. First of all you have hormonal birth control. And that's going to include your IUD's that release hormones, these "Mirena" ring things, and the patch, and the shot, and the mini pill and the combination pill. All hormonal birth control methods, we'll put them in the same category, and they should be immediately ruled out, because they are MANSLAUGHTER. Or, if you do it intentionally, on purpose, it would be MURDER. If you do it by accident, it's manslaughter. Those are ruled out. Well then another method that people would use is the "Onan" method, we'll call it. Spilling it on the ground. The Bible isn't really saying anything positive about that method. Then another method that people would use is a "Barrier" method, is what they'll call it. And to me, a "barrier" method, is pretty much the same thing as Onan's method, I'll put it in the same category. And then another method that's pretty popular amongst Catholics- and this is what the Catholics teach that you should be doing, is called "Natural Family Planning", or NFP. Now, "Natural Family Planning", you're not really using birth control per se, because you're not using barriers, you're not using the pills or anything like that. I'm just going to say it right now. I'm against natural family planning. I don't believe in it. My children are approximately 2 years apart. And we do not use ANY birth control. We use NONE. ZERO. ZILCH. Okay? The only birth control method we use is getting on our knees and praying for God to give us more children. That's our only birth control that we use. But, we never use any. And I'll explain to you a little later how our children are two years apart, and we do not use "Natural Family Planning". "NFP", this is also sometimes known as "the rythmn method". We do NOT use it. And I'm repeating this because people often mistakenly think, "oh, Pastor Anderson believes in Natural Family Planning." Or, "Pastor Anderson believes in the rythmn method." No I don't. I've never taught that. Never believed that. We don't use it. None of our children are spaced through natural family planning. Natural family planning is where you chart out a woman's cycle. And sometimes they will use computer software, smart phone apps, different charts, maybe even take your temperature and chart all this data and enter it into a computer... And this software will tell you when you are the most fertile each month. So there is about five to seven days a month that are blacked out as "ok, this is the time when she is most likely to get pregnant, so if you abstain during these five to seven months, she is probably not going to get pregnant. That's called "Natural Family Planning", or "the rythmn method". Now, alot of Catholics will use this. This is what the Catholic church promotes. And they'll say this. They'll say "well, God could still make you get pregnant if He wanted to... So it's not really birth control." So it's kind of like well, you know, it could still be. But here is why I am against "Natural Family Planning". Because of the fact that first of all, there is another big black out period each month, if you know what I mean. So now we have two major black outs each

month. Number one, okay. But number two, the fact is, that during the black out period is actually the BEST time for a husband and his wife to hit the sack because that's actually when a woman is going to enjoy it the most. And I'm keeping this G rated. But it's just a scientific fact that women actually desire intimacy the MOST during that period. Why? Because when their body is ovulating, and when they are releasing that egg and able to become pregnant, they naturally desire that union with their husband. So, isn't it kind of foolish to black out the best part of the month for intimacy between husband and wife? And to say "okay, well the best time for doing it, the best week, we're not going to do it that week." That's not very good for your marriage, okay? Especially because you now have these two big black out periods each month. So half the month is crossed off the calendar. But not only that, look what the Bible says in 1st Corinthians chapter 7. "Defraud ye not one the other, except it be with consent for a time, that ye may use Natural Family Planning"- is that what it says??? It says "except it be with consent for a time that ye may give yourselves to fasting and prayer; and come together again that Satan tempt you not for your incontinency." What is the purpose of God saying "Hey, do NOT abstain from a physical relationship with your spouse. Do not defraud one the other." He said "because you don't want Satan to tempt you for your incontinency." And the "blackout period" of "Natural Family Planning" is the time when the husband and wife would be the most open to temptation. And God's not even making any allowance for it here. He is not teaching us that "hey, abstain every month in order to avoid having children." No. Children are a BLESSING. You're supposed to be fruitful and MULTIPLY. We're supposed to be having lots of children according to the Bible. Psalm 127 says this...

Dom: (Quoting Psalm 127:3-5)

PA: God says children are a BLESSING, we should want to have our quiver FULL of them. It's a JOY and a BLESSING and a GOOD thing to have children. So when you teach this, and you say "hey, be fruitful, MULTIPLY, increase ABUNDANTLY! EXCEEDINGLY! Have children!! Don't use birth control! You don't need to be Onan! You don't need to murder your own children! You don't need to sit there and abstain from a physical relationship from your spouse during the best parts of the month." No, the Bible is telling us to HAVE CHILDREN. People will say this- "Well, if you do that, you're just going to get pregnant every nine months, and that's not healthy." That's what they'll say. Have you heard this opposition? Now, personally, I don't think that that's healthy, for women to have children every 9 or 10 months. And frankly, that's why God didn't design it that way. And that's why even though my wife and I use no birth control, we do not have children every 9 or 10 months. You say "Pastor Anderson, how do you do it? How are you not having children every 11, 12 months Pastor Anderson? What's the deal? What's your secret?" Hosea chapter 1 verse 8 says this...

Dom: (Quoting Hosea 1:8)

PA: When did this woman conceive? When she weaned. Why? Because breast feeding will STOP you from getting pregnant.

Lady: Simply breastfeeding your baby regularly and exclusively can help you prevent another pregnancy for 6 months. How does it work? Well, if you breastfeed exclusively, that means no formula or other baby foods, the hormones in your body will naturally change to prevent ovulation, the release of an egg. No egg, no pregnancy. This all happens naturally without a prescription or any medication. Breastfeeding is safe, simple and convenient. There are no negative side effects. There is nothing to buy. There are a lot of great health and nutrition benefits for your baby and for you. Breastfeeding is incredibly effective as birth control. So effective that for every 100 women who breastfeed continuously for the first six months after birth, only 1 or 2 of them will get pregnant.

PA: It is 99 percent effective- if you do it properly. If you breastfeed- ON DEMAND- your child... That will prevent you from getting pregnant again until it is naturally safe to do so. Look, God designed it in His wisdom! Think about how smart God is. God designs it where a woman gives

birth to a child and then breastfeeding that child keeps her from getting pregnant again until her body has a chance to recover. And then by the time the child is older and grown, and able to eat a lot of solids and breastfeeding less and less... Then the woman's fertility will come back, and then she will be able to have the next child. And this is not a birth control method, because we were going to breastfeed the kid anyway. It's just called "doing it normal". It's called just "having your kid and feeding it the way God planned. So this isn't natural family planning. That's why I want to make sure there is no confusion here. This is not a birth control method. This is NOT USING BIRTH CONTROL, and yet having children that are spaced normally, and naturally and healthily. But this is why it doesn't work for most people. Because if you put your kid on a four hour feeding schedule- NOT going to work. You must feed the child ON DEMAND, meaning when it is hungry- feed it. And with a newborn, that's pretty much every hour. So when my wife has a little baby, she is feeding the baby constantly. She is nursing it constantly, okay? That's one of the rules. Number two, the baby has to sleep in bed with you, because if you don't have the baby in bed with you, then you can't feed it on demand throughout the night on the hour. Now alot of people will say, "Oh, baby in bed with you, that's a bassinette next to the bed." No. See, this is why it doesn't always work for people. Because they don't follow the protocol that's going to work. They try to do a four hour feeding schedule... They're supplementing with bottles, they're having the baby in a bassinette or a crib or something like that... No. That baby has to be in bed with you. Society wants you using birth control. I think Exodus 1 shows us why. Because the devil doesn't like it when God's people multiply. And while the Mormons are multiplying, and while the Muslims are multiplying... God's people are having 2.5 children and it's a shame. We as God's people need to multiply abundantly and churches would be filled with a new generation that's growing up and learning the word, precept upon precept, line upon line. And they're going to grow up, and be a mighty army for the Lord. But instead, people are refusing to have kids, because they're serving the idols of this world, and chasing after materialism. Or they're buying into the ideology of the Satan-worshipper, Margaret Sanger. Because they are being brainwashed by TV and school and everything else. And I'm here to tell you today that God's way is the BEST way, the NATURAL way, the CHRISTIAN way. And if you would get on God's program by faith, and just step out in faith and say "hey, I'm going to do it God's way", you know, you will find that God will provide, and that God will give you alot of Joy and happiness in your life, and God's going to bless you because the path to God's blessing is through the door of obedience.

Dom: The people of God have been heavily influenced by the ungodly world system. And the key doctrines of the Bible presented here have all but fallen by the wayside. We have gone from condemning ALL methods of birth control, to condoning and even promoting birth control pills, which are the most HEINOUS form of birth control. Would to God this generation would stand up, and fight for this key doctrine of God's word, and cleanse our churches from the blood of our sons and daughters.
